- Build separate arrays and combine them to see the total.

d) Pattern and Strategy Discovery

- Use different colored bricks to explore factors and products.
- Build staircases or layered models to identify patterns.
- Encourage students to find relationships and generalize rules.

e) Word Problem Integration

- Present real-world problems (e.g., "If each desk has 3 Lego chairs and there are 5 desks, how many chairs are there?").
- Have students build models to solve and explain their reasoning.

Assessment and Reflection

- Encourage students to explain their Lego models.
- Use questioning to assess understanding:
 - "How does your model represent the multiplication fact?"
 - "What pattern do you notice in your bricks?"
- Reflect on different strategies used and their effectiveness.

Tips for Success

- Start with simple problems and gradually increase complexity.
- Incorporate color coding to differentiate factors.
- Use open-ended questions to promote exploration.
